

Aditya Naik

Product Designer & Researcher | adityamanojnaik@gmail.com | (317) 429-7715 | Indianapolis, IN | <https://adityanaik.work>

SUMMARY

Product Designer with an MS in Human-Computer Interaction and a track record of leading research-backed design from ambiguity to shipped concept. Led a 107-participant mixed-methods study for Toyota using AI-moderated research, cutting turnaround by 40%. National and state-level design hackathon winner. Fluent across the full design cycle, generative research, systems design, high-fidelity prototyping, and agentic AI-assisted workflows.

EDUCATION

Indiana University

Master of Science, Human-Computer Interaction (HCI) | GPA: 3.92/4.00

Achievements: Merit Scholar

May 2026

Goa University

Bachelor of Engineering, Information Technology | GPA: 9.25/10.00

Achievements: National & State-Level UI/UX Designathon Winner — 2022, 2023, 2024

May 2024

EXPERIENCE

Toyota Mobility Foundation | Product Designer

Aug 2025 – May 2026

- **Led** a mixed-methods user research study across **107 participants** using an AI-moderated interview methodology (Genway) with bilingual, accessible, low time commitment protocols, delivering insights **40% faster than traditional fieldwork methods**.
- Synthesized 323 coded data points in Dedoose via **thematic analysis and affinity mapping**, identifying transportation as a critical access barrier and directly informing Toyota's strategic pivot toward integrated AV service infrastructure.
- **Facilitated 3 co-design workshop** sessions across **30+ participants**, internal engineering teams from Purdue and Butler University, senior community volunteers, and system-level stakeholders including Toyota, IndyGo, and the Metropolitan Planning Council of Indiana, translating **lived experience into actionable service blueprints**.
- **Designed and deployed** a live interactive storytelling website using Figma, Figma MCP, Claude Code, and Gemini to communicate the AV service concept to stakeholders, presenting a before/after narrative of user life with and without AV access; **87% of stakeholders rated the concept as viable in an end-of-site survey**.

Indiana University | Product Designer

Aug 2024 – May 2026

- **Led end-to-end** UX research for JobBox.cc, a Gmail-integrated job-alert platform with 500+ users for 6 months, conducting **competitive analysis across 8 job-tracking platforms** (LinkedIn, Teal, Huntr) and developing personas, use-case diagrams, and task flows to model job seeker journeys.
- **Designed and delivered** a high-fidelity Figma prototype for JobBox introducing a new information architecture, visual pipeline stage tracker, and customizable filtering, **validated through moderated think-aloud usability testing and iterative synthesis of qualitative** findings; recommendations were adopted into the platform's product roadmap under an active advisory engagement.
- **Conducted** heuristic evaluation and cognitive walkthrough on Hidea's Cats & Soup, a mobile game with 39M+ downloads **applying behavioral psychology frameworks** (operant conditioning, Self-Determination Theory) to diagnose **information architecture and cognitive load issues** across 5 in-app shops and 3 resource economies; identified **6 actionable redesign opportunities**.
- **Redesigned** core navigation and progression architecture for Cats & Soup, replacing a 5-shop flat structure and unbounded 900+ level system with categorized navigation and tiered progression to reduce cognitive load and improve player retention mechanics.

Google Developer Student Clubs | Head of Design

Aug 2024 – May 2026

- Led visual design strategy for GDSC, brainstorming and designing **150+ assets** ranging from surveys design, social media marketing, physical media and advertainments.
- **Drove 28% YoY increase** in event signups by designing and scaling a reusable landing page template across 15 event campaigns; **led end-to-end UX design**, wireframing, prototyping, and A/B testing in Figma

PUBLICATIONS & CERTIFICATIONS

First Author: Artificial Empathy: AI-based Mental Health ([arXiv](#), [Cornell University](#)) | **First Author:** Driver Drowsiness Using Smart Glasses ([IEEE](#), [Tashkent](#), [Uzbekistan](#)) | **Certification:** Google UX Design Certificate, Georgia Institute of Technology – UED Certificate

SKILLS

Research & Evaluation: User Interviews, Usability Testing, Think-Aloud Protocol, Survey Design, Affinity Mapping, Thematic Analysis, Heuristic Evaluation, Competitive Analysis, Journey Mapping, Personas, Mixed Methods, A/B Testing, Cognitive Walkthrough, Empathy Mapping, Contextual Inquiry, Focus Groups, Ethnography, System Usability Scale (SUS), Qualtrics, Maze, Dedoose

Design & Prototyping: Figma, Figma Make, Figma MCP, Sketch, Adobe XD, Wireframing, High-Fidelity Prototyping, Interaction Design, Information Architecture, Design Systems, Design Tokens, User Flows, Service Blueprints, Storyboarding, Responsive Design, Mobile Design, WCAG 2.1 AA/AAA, ARIA, Typography, Color Theory, Visual Design

Collaboration & Strategy: Cross-Functional Collaboration, Stakeholder Management, Design Presentations, Co-Design Facilitation, Design Handoff, Agile, Scrum, Lean UX, Design Ops, Product Strategy

AI & Development: Claude Code, Figma MCP, Cursor, Bolt, Lovable, Replit, Vercel, Supabase, Prompt Engineering, Agentic Workflows, AI-Assisted Development, HTML5, CSS3, JavaScript, React, Python, Git, WordPress
