New Codes Decisions

ADD AS NEW **MERGE** **DROP**

Add as New Code

CARE_INFRA ADD AS NEW CODE	
Decision	ADD AS NEW CODE. Add CARE_INFRA as a new top-level code.
Definition	An existing, unpaid, informal person, route, or network that repeatedly moves food, goods, care, or information for others and functions as real mobility or distribution infrastructure.
Include when	A passage describes redistribution circuits, personal delivery routes for homebound neighbors, informal caregiver-as-driver arrangements, or word-of-mouth information networks that serve others.
Exclude when	The network is wished for or hypothetical; the activity is a one-off errand; the passage only describes personal mobility; or it names an isolated skill or resource that belongs under CAPABILITIES.

Merge with Existing Codes

COMMUNITY_BUILT MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under CAPABILITIES and INPUT_PART_PRESENT; combine with COGOVERN where the emphasis is binding community authorship.
Definition	When residents or community organizations are resourced to build their own plan, scenario, or design rather than only react to one, the result can match or outperform the agency or industry default on the sponsor's own terms.
Include when	Any lit claim that a community-authored alternative matched or beat a default, or evidence the community already runs what the formal system forbids.
Exclude when	Consultation that collects input without influence (E7).
Literature basis	Mechanism 6: Karner et al. 2020; Gripper et al. 2022; Severs et al. 2022; Prost et al. 2018; Heitlinger et al. 2021; Baumann et al. 2018; Sörries et al. 2024; Gomes et al. 2026; Pineo et al. 2026

CONSULT_NO_POWER MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under INPUT_PART_ABSENT as consultation without decision-making authority.
Definition	Formal public involvement processes solicit community input through meetings, committees, or task forces, but rarely give that input binding influence over the final decision.
Include when	Lit evidence that an inclusive-sounding process reproduced exclusion or collected input without power transfer.
Exclude when	Community-built alternatives with real authority (C7).
Literature basis	Mechanism 1: Pinski et al. 2024; Bailey et al. 2012; Karner et al. 2020; McCullough et al. 2024; van Holstein et al. 2020; Klaever et al. 2025; Hicks, Kingsley, and Isett 2025; Barendregt, Bendor, and van Eekelen 2024; Cresswell Riol and Connelly 2025; Joassart-Marcelli, Bosco, and McFadden 2026

PERF_VS_AUTH MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge with CONSULT_NO_POWER under INPUT_PART_ABSENT.
Definition	Equity practices that claim inclusion without redistributing decision-making power (performative) versus those that do (authentic).
Include when	Lit claims distinguishing performative inclusion from real power transfer.
Exclude when	Simple consultation logistics.
Literature basis	Mechanism 1: McCullough et al. 2024

NEGATIVE_SELFEFF MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under INPUT_PART_ABSENT as withdrawal after exclusion or being ignored.
Definition	People stop participating entirely after being ignored or humiliated: prior negative experiences teach them their input will not be needed.
Include when	A client's expressed doubt that speaking up matters, plus the lit mechanism.
Exclude when	General service distrust without a participation referent.
Literature basis	Mechanism 2: Klaever et al. 2025

DIGNITY_STRUCT MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under VALUES as a structural-dignity subcode.
Definition	Whether a service preserves or strips dignity is a concrete, structural design property, not an unavoidable side effect of receiving help: minimizing burden, respecting autonomy, avoiding stigma.
Include when	Lit components of high-dignity service (Brenton components; Chapman journey-wide dignity), plus transcript evidence of a dignity-preserving service.
Exclude when	Dignity as a value only (B4).
Literature basis	Mechanism 7: Cresswell Riol and Connelly 2023, 2025; Brenton, Tindall, Glanz, and Virudachalam 2025; Chapman et al. 2024

COGOVERN MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under INPUT_PART_PRESENT as binding participation or co-governance.
Definition	The community participates not as consulted public but as co-governor of the service, with binding influence over design decisions.
Include when	Lit evidence that resourced community authorship changes outcomes, and workshop conditions requiring co-production.
Exclude when	Consultation with no power transfer (E7).
Literature basis	Mechanism 6: Karner et al. 2020; Severs et al. 2022; Tan et al. 2025

THROUGHPUT MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under EFF_VALUE; throughput is already part of the original definition.
Definition	The Engineering/Safety literature organizes evaluation around network throughput, capacity, and automation share, with people appearing only as trip counts.
Include when	Model-level claims about capacity, penetration rate, or level of service.
Exclude when	Trade-offs named with riders as humans.
Literature basis	Mechanism 3: Lu, Tettamanti, Horcher, and Varga 2020; Park, Jang, and Ko 2024; Pimenta, Kamruzzaman, and Currie 2023

TRUST_METRIC MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under EFF_VALUE and use as a contrast to JUST_TRUST.
Definition	Trust is measured and tuned as an individual psychological score rather than built and sustained through an ongoing relationship.
Include when	Trust-in-automation studies that model, score, or calibrate trust.
Exclude when	Relational trust, being known (B2).
Literature basis	Mechanism 2: Kraus, Scholz, Stiegemeier, and Baumann 2020; Lee and Kolodge 2020; Alkurdi and Alsaid 2025; Zoellick et al. 2019; Tan et al. 2025 (contrast)

EXPERTS_CENTERED MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under INPUT_PART_ABSENT as expert-centered decision-making.
Definition	The default answer to who is centered is the credentialed professional, official, or researcher synthesizing data, not the resident whose mobility the system shapes.
Include when	Evidence of who a study or policy centers: who_is_centered_counts.csv, engineering policy advice authored by credentialed insiders.
Exclude when	Studies that do center residents or clients.
Literature basis	Mechanism 4: Hicks, Kingsley, and Isett 2025; Lu et al. 2020; Robles and Mallinson 2024; Zhang et al. 2024; Jeghers et al. 2024; Di Ruocco 2025; Murray et al. 2023; Shaker et al. 2023.

FRICTION_MANAGED MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Merge under BREAKDOWN and MISALIGNMENT; use it for institutional treatment of resistance as a problem to manage.
Definition	The AV field reads the same friction one thread treats as data, pedestrians testing a shuttle, stepping in front of it, pressing the emergency button, as distrust to manage, up to flagging non-compliant users to police.
Include when	Lit examples of resistance read as distrust or a problem to manage.
Exclude when	Friction as signal (see Lit evidence map contrast).
Literature basis	Mechanism 5: Nordhoff et al. 2020 versus Forlano and Mathew 2014

CONDITIONALITY	MERGE WITH EXISTING CODE
Decision	MERGE WITH EXISTING CODE. Merge under JUST_ACCESS or CONSTRAINTS when access depends on proving eligibility or deservingness.
Definition	Receiving help is conditioned on demonstrating deservingness: surveillance of recipients and an expectation of gratitude as repayment.
Include when	Lit mechanisms connecting charity to conditionality and surveillance.
Exclude when	The ID-card rule at the pantry (D3).
Literature basis	Mechanism 7, 1: Cresswell Riol and Connelly 2025

ACCESS_AS_EFF	MERGE WITH EXISTING CODE
Decision	MERGE WITH EXISTING CODE. Use EFF_VALUE with JUST_ACCESS and, when a value gap is explicit, MISALIGNMENT.
Definition	Digital food platforms judge access against an efficiency standard instead of a procedural-inclusion or recognition one.
Include when	Lit claims that platforms or systems treat access as optimization.
Exclude when	Digital-only pantry rules in the transcripts (D5).
Literature basis	Mechanism 3: Joassart-Marcelli, Bosco, and McFadden 2026; Deener 2017

EFFICIENCY_SURPLUS	MERGE WITH EXISTING CODE
Decision	MERGE WITH EXISTING CODE. Use INFRA_FRAME, EFF_VALUE, and MISALIGNMENT rather than a separate code.
Definition	An efficiency-led reorganization of the food system severed the residents it no longer served, and is the structural context a pantry sits inside.
Include when	Lit claims about reorganization with negative access consequences.
Exclude when	Clause 7 positive design discussion (G).
Literature basis	Mechanism 3: Deener 2017

SAFETY_ENG MERGE WITH EXISTING CODE	
Decision	MERGE WITH EXISTING CODE. Keep SAFETY_ENG as a subcode of EFF_VALUE, not as a standalone addition.
Definition	Safety or acceptance is operationalized as a measurable, tunable system property, such as take-over time, perceived safety, or acceptance scores.
Include when	A study explicitly converts safety or acceptance into a system measure, model input, or optimization target.
Exclude when	The evidence concerns relational trust, lived access, or an unmeasured account of feeling safe.
Literature basis	Mechanism 3: Zhang et al. 2019; Nordhoff et al. 2020; Zoellick et al. 2019
CAPABILITIES REVISE EXISTING CODE	
Decision	REVISE EXISTING CODE. Narrow the existing definition so CAPABILITIES covers identifiable assets and skills, not recurring care networks.
Definition	Existing skills, knowledge, and material resources that a person or community organization can draw on to navigate mobility and food access.
Include when	A passage names an existing asset such as multilingual ability, local knowledge, credentials, access to a vehicle or device, or another identifiable skill or resource.
Exclude when	A recurring unpaid route or network serves others (CARE_INFRA); the resource is only wished for; or persistence is described without a specific skill, knowledge base, or material resource.

Drop

SURVEILLANCE DROP	
Decision	DROP. Drop because it is peripheral to the paper's stated argument.
Definition	Verification and monitoring arrive with the system: face verification, body-posture intent inference at crossings, flagging non-compliant road users to police.
Include when	Lit and design-team evidence of monitoring or verification functions.
Exclude when	Verification rules already in the pantry (D3).
Literature basis	Mechanism 5: Nordhoff et al. 2020; Capstone C04 face verification

CHARITY_REFRAIM	DROP
Decision	DROP. Drop because it shifts the paper toward a broader critique of food charity not made in the central argument.
Definition	The growth of food charity reframes hunger as a personal failing and strips recipients of autonomy, choice, and political voice.
Include when	Lit claims tracing how charity models re-frame the recipient.
Exclude when	Individual-client evidence of stigma (B4).
Literature basis	Mechanism 7: Cresswell Riol and Connelly 2023, 2025

APARTHEID_GEO	DROP
Decision	DROP. Drop as a code; retain relevant literature only as background context if needed.
Definition	Food deserts trace to a path-dependent reorganization of retail distribution that prioritized system efficiency, together with neighborhoods that built their own response gardens.
Include when	Lit evidence of retail abandonment, racialized access gaps, and community-built food systems.
Exclude when	Predatory-pricing observations in the transcripts.
Literature basis	Mechanism 3, 6, 4: Deener 2017; Shaker et al. 2023; Gripper et al. 2022
