

New Literature Derived Codes

Mobility as Social Service research codebook

The final codebook identifies 17 Tier L codes that were added from the research literature. Six extend existing domains C, E, and G; six form domain H; and five form domain I. This guide presents the coding boundaries and evidence recorded in the workbook so each code can be applied consistently.

Source of record. Codebook_final.xlsx, especially the Codebook and LitEvidenceMap sheets. Definitions, inclusion and exclusion rules, examples, locators, crosswalks, and citations below come from those sheets.

How to Use This Guide

1. Use Definition to identify the concept, Include when to decide what qualifies, and Exclude when to separate nearby codes.
2. Tier L means the literature introduced the code. Some Tier L codes also have a transcript example or workshop cross-reference.
3. Reference numbers connect each code to full paper records in the References section. A missing DOI or URL is stated explicitly rather than supplied from outside the workbook.

Codes Added to Existing Domains

Domain C Alignment what works

COMMUNITY BUILT

COMMUNITY_BUILT Tier L Thesis clause C7	
Domain	C Alignment: what works
Definition	When residents or community organizations are resourced to build their own plan, scenario, or design rather than only react to one, the result can match or outperform the agency or industry default on the sponsor's own terms.
Include when	Any lit claim that a community-authored alternative matched or beat a default, or evidence the community already runs what the formal system forbids.
Exclude when	Consultation that collects input without influence (E7).
Example	No transcript example is recorded. Use the literature evidence and references listed below.

Domain E Participation gap infrastructure without community

CONSULT NO POWER

CONSULT_NO_POWER Tier L Thesis clause C2	
Domain	E Participation gap: infrastructure without community
Definition	Formal public involvement processes solicit community input through meetings, committees, or task forces, but rarely give that input binding influence over the final decision.

CONSULT_NO_POWER Tier L Thesis clause C2	
Include when	Lit evidence that an inclusive-sounding process reproduced exclusion or collected input without power transfer.
Exclude when	Community-built alternatives with real authority (C7).
Example	No transcript example is recorded. Use the literature evidence and references listed below.
Locator	Not recorded

PERF VS AUTH

PERF_VS_AUTH Tier L Thesis clause C2	
Domain	E Participation gap: infrastructure without community
Definition	Equity practices that claim inclusion without redistributing decision-making power (performative) versus those that do (authentic).
Include when	Lit claims distinguishing performative inclusion from real power transfer.
Exclude when	Simple consultation logistics.
Example	No transcript example is recorded. Use the literature evidence and references listed below.

NEGATIVE SELFEFF

NEGATIVE_SELFEFF Tier L Thesis clause C6	
Domain	E Participation gap: infrastructure without community
Definition	People stop participating entirely after being ignored or humiliated: prior negative experiences teach them their input will not be needed.
Include when	A client's expressed doubt that speaking up matters, plus the lit mechanism.
Exclude when	General service distrust without a participation referent.
Example	"I don't know if somebody's going to actually listen or whatever"
Locator	sec-participant-01, turn 21, Interviewee

Domain G Mobility as Social Service (target state)

DIGNITY STRUCT

DIGNITY_STRUCT Tier L Thesis clause C7	
Domain	G Mobility as Social Service (target state)
Definition	Whether a service preserves or strips dignity is a concrete, structural design property, not an unavoidable side effect of receiving help: minimizing burden, respecting autonomy, avoiding stigma.
Include when	Lit components of high-dignity service (Brenton components; Chapman journey-wide dignity), plus transcript evidence of a dignity-preserving service.
Exclude when	Dignity as a value only (B4).
Example	"they do not discriminate against you, they see you as another family united with the community."
Locator	sec-participant-11-sp, 15:13:44; translated
Crosswalk	OG: n/a MaSS: VALUES close Capstone: n/a

COGOVERN

COGOVERN Tier L Thesis clause C7	
Domain	G Mobility as Social Service (target state)
Definition	The community participates not as consulted public but as co-governor of the service, with binding influence over design decisions.
Include when	Lit evidence that resourced community authorship changes outcomes, and workshop conditions requiring co-production.
Exclude when	Consultation with no power transfer (E7).
Example	No verbatim quote is recorded. The workbook points to design principle 11, "Build it with the community."
Locator	Not recorded

Domain H The Discourse the AV Carries

THROUGHPUT

THROUGHPUT Tier L Thesis clause C3	
Domain	H The discourse the AV carries (lit-derived)
Definition	The Engineering/Safety literature organizes evaluation around network throughput, capacity, and automation share, with people appearing only as trip counts.
Include when	Model-level claims about capacity, penetration rate, or level of service.
Exclude when	Trade-offs named with riders as humans.
Example	No transcript example is recorded. Use the literature evidence and references listed below.
Locator	Not recorded

SAFETY ENG

SAFETY_ENG Tier L Thesis clause C3	
Domain	H The discourse the AV carries (lit-derived)
Definition	Safety is operationalized as a margin to be managed (take-over time, perceived safety) and acceptance as a measurable attitude.
Include when	Claims that perceived safety or acceptance is something a system can be tuned to produce.
Exclude when	Relational trust or lived access concerns.
Example	No transcript example is recorded. Use the literature evidence and references listed below.
Locator	Not recorded
Crosswalk	OG: n/a (new) MaSS: EFF_VALUE Capstone: n/a

----------------------	--

TRUST METRIC**TRUST_METRIC Tier L Thesis clause C3**

Domain	H The discourse the AV carries (lit-derived)
Definition	Trust is measured and tuned as an individual psychological score rather than built and sustained through an ongoing relationship.
Include when	Trust-in-automation studies that model, score, or calibrate trust.
Exclude when	Relational trust, being known (B2).
Example	No transcript example is recorded. Use the literature evidence and references listed below.
Locator	Not recorded
Crosswalk	OG: n/a (new) MaSS: JUST_TRUST (contrast) Capstone: n/a

EXPERTS CENTERED**EXPERTS_CENTERED Tier L Thesis clause C6**

Domain	H The discourse the AV carries (lit-derived)
Definition	The default answer to who is centered is the credentialed professional, official, or researcher synthesizing data, not the resident whose mobility the system shapes.
Include when	Evidence of who a study or policy centers: who_is_centered_counts.csv, engineering policy advice authored by credentialed insiders.
Exclude when	Studies that do center residents or clients.
Example	No transcript example is recorded. Use the literature evidence and references listed below.

SURVEILLANCE

SURVEILLANCE Tier L Thesis clause C5	
Domain	H The discourse the AV carries (lit-derived)
Definition	Verification and monitoring arrive with the system: face verification, body-posture intent inference at crossings, flagging non-compliant road users to police.
Include when	Lit and design-team evidence of monitoring or verification functions.
Exclude when	Verification rules already in the pantry (D3).
Example	No transcript example is recorded. Use the literature evidence and references listed below.

FRICTION MANAGED

FRICTION_MANAGED Tier L Thesis clause C5	
Domain	H The discourse the AV carries (lit-derived)
Definition	The AV field reads the same friction one thread treats as data, pedestrians testing a shuttle, stepping in front of it, pressing the emergency button, as distrust to manage, up to flagging non-compliant users to police.
Include when	Lit examples of resistance read as distrust or a problem to manage.

FRICTION_MANAGED Tier L Thesis clause C5	
Exclude when	Friction as signal (see Lit evidence map contrast).
Example	No transcript example is recorded. Use the literature evidence and references listed below.

Domain I The Charity Model and Digital Food System

CHARITY REFRAIM

CHARITY_REFRAIM Tier L Thesis clause C5	
Domain	I The charity model and digital food system (lit-derived)
Definition	The growth of food charity reframes hunger as a personal failing and strips recipients of autonomy, choice, and political voice.
Include when	Lit claims tracing how charity models re-frame the recipient.
Exclude when	Individual-client evidence of stigma (B4).
Example	No transcript example is recorded. Use the literature evidence and references listed below.

CONDITIONALITY

CONDITIONALITY Tier L Thesis clause C5	
Domain	I The charity model and digital food system (lit-derived)
Definition	Receiving help is conditioned on demonstrating deservingness: surveillance of recipients and an expectation of gratitude as repayment.
Include when	Lit mechanisms connecting charity to conditionality and surveillance.
Exclude when	The ID-card rule at the pantry (D3).
Example	No transcript example is recorded. Use the literature evidence and references listed below.

ACCESS AS EFF

ACCESS_AS_EFF Tier L Thesis clause C3	
Domain	I The charity model and digital food system (lit-derived)
Definition	Digital food platforms judge access against an efficiency standard instead of a procedural-inclusion or recognition one.
Include when	Lit claims that platforms or systems treat access as optimization.
Exclude when	Digital-only pantry rules in the transcripts (D5).
Example	No transcript example is recorded. Use the literature evidence and references listed below.

APARTHEID GEO

APARTHEID_GEO Tier L Thesis clause C4	
Domain	I The charity model and digital food system (lit-derived)
Definition	Food deserts trace to a path-dependent reorganization of retail distribution that prioritized system efficiency, together with neighborhoods that built their own response gardens.
Include when	Lit evidence of retail abandonment, racialized access gaps, and community-built food systems.
Exclude when	Predatory-pricing observations in the transcripts.
Example	No transcript example is recorded. Use the literature evidence and references listed below.

EFFICIENCY SURPLUS

EFFICIENCY_SURPLUS Tier L Thesis clause C5	
Domain	I The charity model and digital food system (lit-derived)
Definition	An efficiency-led reorganization of the food system severed the residents it no longer served, and is the structural context a pantry sits inside.
Include when	Lit claims about reorganization with negative access consequences.
Exclude when	Clause 7 positive design discussion (G).
Example	No transcript example is recorded. Use the literature evidence and references listed below.
